MUNARDI

SOFTWARE ENGINEER

Jakarta, Indonesia | 089665241717 | dira20590@gmail.com | linkedin.com/in/munardi | https://munardi15.github.io/portofolio-munardi

PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience designing high-throughput backend services, automating distributed data pipelines, and developing enterprise software across banking and financial domains. Proficient in Go (Golang), Python, PHP, Node.js, SQL Server, and Docker. Track record of modernizing legacy ETL workflows, cutting processing latency by up to 60%, and managing mission-critical batch workflows with 99.9% uptime.

TECHNICAL SKILLS

PROGRAMMING LANGUAGES:

Go (Golang), Python, PHP, JavaScript, TypeScript, Java, SQL, Bash

BACKEND & ARCHITECTURE:

Fiber, GORM, gocron, Laravel, Express.js, Spring Boot, Microservices, Clean Architecture, RESTful APIs

FRONTEND TECHNOLOGIES:

React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Axios

DATABASES & STORAGE:

Microsoft SQL Server (Stored Procedures, Dynamic SQL, Query Tuning, Bulk Insert), PostgreSQL, MySQL, MongoDB, MinIO Object Storage

DEVOPS & CI/CD:

Docker (Multi-stage Builds), Kubernetes (Helm), Bamboo CI/CD, Git, Bitbucket, Elastic APM, Linux/Apache

SECURITY & INTEGRATIONS:

AES-256 & GPG Encryption, SFTP/FTP Automation, ETL Migration (SSIS to Go), AS400 Core Banking

PROFESSIONAL EXPERIENCE

Bank Rakyat Indonesia (BRI) – Under Vendor — **Oct 2025 – Present**

Software Engineer (Back End Specialist) — ***Jakarta, Indonesia***

- **Architect high-performance batch processing microservices in Go (Fiber, GORM, gocron) to automate core BRIVA operations, processing 500,000+ daily banking transactions.**
- **Orchestrate a modular 7-service scheduler ecosystem (sch-log-activity, sch-param-ftp, sch-data-update)**

integrated with SQL Server and MinIO, reducing job failure rates by 35%.

- Deploy a centralized REST API in Fiber for real-time telemetry across distributed jobs, cutting incident detection and response time from 45 minutes to under 2 minutes.
- Automate secure data synchronization between remote SFTP/FTP servers and MinIO Object Storage, reliably processing 100+ GB of financial parameter files daily.
- Spearhead legacy modernization by replacing 3 complex SSIS DTSX packages with the sch-parse-file-merah-putih Go service, slashing execution duration by 60% and CPU utilization by 45%.
- Program a multi-threaded Python cryptographic engine utilizing AES-256 and GPG algorithms, securing 10,000+ ATM settlement records daily with 0% data corruption.
- Containerize deployments via Docker multi-stage builds and Kubernetes Helm charts across Bamboo CI/CD pipelines, shrinking image artifacts by 65%.
- Standardize 25+ SQL database stored procedures and author formal audit compliance memos (nota dinas), securing 100% audit pass rates in regulatory reviews.

Hitachi Channel Solutions **2024 – Sep 2025**

Software Engineer ***Jakarta, Indonesia***

- **Engineered full-stack features for IMHOTS Asset Management and EJ Dashboard using Laravel and MySQL, monitoring 1,200+ ATM terminals across 5 major partner banks.**
- **Optimized SQL execution plans, indexing strategies, and temporary table routines, accelerating query execution times by 85% (from 12s down to 1.8s) across 10M+ transaction rows.**
- **Constructed custom Python/PHP ETL miniscripts and bulk-insert routines, reducing monthly asset data ingestion time by 75% (from 4 hours to 30 minutes) for 50,000+ records.**
- **Provisioned Apache/XAMPP production servers and implemented systemd auto-recovery daemons, maintaining 99.9% service availability across 15+ banking client sites.**

Bank OCBC NISP **2022 – Feb 2024**

Software Engineer ***Jakarta, Indonesia***

- **Modernized legacy desktop reconciliation software (ProRekonATM) into a responsive React.js and Go web application, streamlining daily settlement for 80+ internal finance users.**
- **Refactored transaction settlement pipelines against third-party billers, reconciling 200,000+ monthly billing**

records and eliminating 15+ hours of weekly manual reconciliation.

- Validated transaction data integrity against AS400 Core Banking ledgers and executed physical ATM device testing, eliminating 100% of discrepancy edge cases.

KNusantara Group **Apr 2023 – Dec 2023**

Backend Engineer & Analyst ***Jakarta, Indonesia***

- Delivered 20+ secure RESTful API endpoints using PHP Laravel and MySQL, supporting 5,000+ daily active users with 99.8% service uptime.

BRI Life **2020 – 2022**

Backend Developer ***Jakarta, Indonesia***

- Built backend microservices using Node.js and Express.js, modeling insurance product schemas on SQL Server to reduce backend response latency by 30%.

EDUCATION

Universitas Mercu Buana **2018 – 2022**

Bachelor of Science in Information Systems (GPA: 3.71 / 4.00) ***Jakarta, Indonesia***

SMKN 42 Jakarta **2014 – 2017**

Diploma in Office Administration ***Jakarta, Indonesia***

TRAINING & ADDITIONAL TECHNICAL EXPERIENCE

Code Academy Bootcamp **2019**

Full-Stack Software Engineering Trainee (Java Spring Boot & React.js) ***Jakarta, Indonesia***

- Completed 400+ hours of hands-on software development training, building full-stack enterprise applications with Java Spring Boot microservices, React.js frontend

components, and PostgreSQL databases.

Independent IT Solutions **Jan 2019 – Present**

Systems & IT Infrastructure Specialist (Freelance) ***Jakarta, Indonesia***

- Administered end-to-end hardware diagnostics, Linux/Windows OS configurations, and network optimizations across 150+ client devices, maintaining a 98% client satisfaction rate.
